Liyuan Cao

Beijing International Center for Mathematical Research
Peking University
No.5 Yiheyuan Road
Room 24-2, Quanzhai
Haidian District, Beijing

Email: liyuancao7@gmail.com, caoliyuan@bicmr.pku.edu.cn
Website: https://liyuancao.github.io
WeChat: Liyuan_Cao

Education

Doctor of Philosophy in Industrial Engineering 2016 - 2021
Department of Industrial and Systems Engineering, Lehigh University
advisor: Katya Scheinberg

Master of Engineering in Industrial Engineering 2014 - 2016
Department of Industrial and Systems Engineering, Lehigh University

Bachelor of Engineering in Mechanical Engineering 2010 - 2014
College of Mechanical & Electrical Engineering, Nanjing University of Aeronautics & Astronautics

Employment

Postdoc Beijing International Center for Mathematical Research, Peking University 2021 - present
advisor: Zaiwen Wen
Funded by Boya Postdoctoral Fellowship and International Postdoctoral Exchange Fellowship.

Intern Robert Bosch LLC in Sunnyvale, CA, USA Summer 2019
Developed a method to automatically tune the hyperparameters in a machine learning task to be used in assisted vehicle brake system.

Givens Fellow Argonne National Laboratory Summer 2018
Worked on derivative-free multi-objective optimization.

Teaching/Research Assistant Lehigh University 2016 - 2021

Intern Huakuo Auto&Eng Co., LTD in Shanghai, China Summer 2016

Publications

[1] Liyuan Cao, Albert S Berahas, and Katya Scheinberg. First-and second-order high probability complexity bounds for trust-region methods with noisy oracles. *arXiv preprint arXiv:2205.03667*, 2022. Submitted to *Mathematical Programming*.

[2] Liyuan Cao. *Model-Based Derivative-Free Optimization Methods and Analysis of Stochastic Nonlinear Optimization*. PhD thesis, Lehigh University, 2021

[3] Albert S Berahas, Liyuan Cao, Krzysztof Choromanski, and Katya Scheinberg. A theoretical and empirical comparison of gradient approximations in derivative-free optimization. *Foundations of Computational Mathematics*, 22(2):507–560, 2022

[4] Albert S Berahas, Liyuan Cao, and Katya Scheinberg. Global convergence rate analysis of a generic line search algorithm with noise. *SIAM Journal on Optimization*, 31(2):1489–1518, 2021

[5] Fenlan Wang and Liyuan Cao. A new algorithm for quadratic integer programming problems with cardinality constraint. *Japan Journal of Industrial and Applied Mathematics*, 37(2):449–460, 2020

Talks

High Probability Complexity Bounds for Trust-Region Methods with Noisy Oracles
ORSC2022, Changsha, Hunan, China, October 2022
INFORMS Annual Meeting (virtual), Anaheim, CA, USA, October 2021

Complexity analysis of gradient descent with line search under noise
ShanghaiTech University, Shanghai, China, October 2021

Adapting derivative-free methods for Hyperparameter Tuning Problems
INFORMS Annual Meeting (virtual), National Harbor, MD, USA, November 2020

Gradient approximation methods in derivative-free optimization
MOPTA Conference, Bethlehem, PA, USA, August 2021
INFORMS Annual Meeting, Seattle, WA, USA, October 2019
MOPTA Conference, Bethlehem, PA, USA, August 2019
ICCOPT Conference, Berlin, Germany, August 2019
INFORMS Annual Meeting, Phoenix, AZ, USA, November 2018

Software

DFO-TR a practical derivative-free trust-region method designed to solve unconstrained black-box optimization problems, available in Python 3 and Matlab, link: `https://github.com/LiyuanCao/DFOTR`

Services

Professional Community Services
President, Lehigh University INFORMS Student Chapter, 2019-2020
Treasurer, Lehigh University INFORMS Student Chapter, 2018-2019

Conference Organization
INFORMS Annual Meeting 2021: Derivative Free Optimization Algorithms and Applications

Journal Paper Review
Journal of Optimization Theory and Applications
IMA journal of Numerical Analysis
INFORMS Journal on Computing
SIAM Journal on Optimization

Conference Paper Review
The Platform for Advanced Scientific Computing (PASC) Conference 2019
